TRUNORTH DECK BOARDS

THE PRODUCT

The TruNorth® deck is a lightweight, encapsulated board, available in 12 stunning colors. Certified to meet building codes, this board reduces weight/cost and 95% of it is comprised of recycled materials. Backed by our 10-year warranty, these boards are extremely durable.

WHAT IS THE TRUNORTH DECKING SYSTEM?

A 2x4 pressure treated sleeper frame sits directly on top of a solid surface to facilitate drainage and allow air to circulate under the decking. They are typically connected to rim joists, but they don't have to be standing on the edges like normal joists. Composite boards are then attached to the sleeper frame using a unique Slide & Go® hidden fastening system to create a solid and elegant level surface.

TRUNORTH DECKING APPLICATION

Condo Kandy can supply and install TruNorth Decking in a variety of applications. With the TruNorth Decking System, we can ensure the highest quality decking solution over surfaces where an interlocking tile floating floor may not work. The sleeper frame can be built over surfaces including uneven rooftops, bitumen membranes, paver stones, hard packed gravel, concrete, interlocked brick, porcelain tile, and more.

ADVANTAGES

- Heat blocking capping.
- Lightweight with no wood filler used.
- Woodgrain appearance.
- Long-lasting and durable.
- No painting, staining or sealing.
- No splinters, slivers or revealing nails.
- Resistant to rotting mold, fungi & pests.
- Simple Slide & Go® fastening system.
- 10-year limited warranty which includes a Stain & Fade warranty.

SPECIFICATIONS

Our TruNorth Deck boards are 5¹/₈" wide (5¹/₁₆" with installation clip), 1" tall, and come in 3 different lengths: 12', 16', and 20'.

Length	Width	Height	Weight (lbs)
12'	5 ¹ / ₈ "	1"	21
16'	5 ¹ / ₈ "	1"	28
20'	5 ¹ / ₈ "	1"	35
