## ACTIVE ROOFTOP RUBBER FLOORING

#### **COMPOSITION & MANUFACTURE**

Kandy Rubber Tiles are manufactured using 100% recycled rubber and are an ideal flooring solution for rooftops and terrace surfaces. These highly durable interlocking rubber tiles offer a high grip, slightly yielding surface that is ideal for covering Bitumen, Modbit, Torch On, Duradek, and other roofing membrane systems.

#### **PERFORMANCE & MAINTENANCE**

The porous material allows for efficient drainage as well as providing a weather and UV resistant surface. These 2' x 2' tiles will be laid directly on top of a flat and level surface to create an interlocked floating flooring system that is aesthetically pleasing and made to last. These low maintenance rubber tiles are easy to keep clean. Use a broom to sweep the tiles free of any debris or give them a rinse when needed.

#### **HIGHLIGHTS & DETAILS**

- Covers Bitumen, Modbit, Torch On, Duradek, and other roofing membrane systems
- Durable 2' x 2' recycled rubber tiles with a 12" x 12" crosshatch pattern
- Available in three colors (black, red and green)
- Weather resistant and UV stabilized
- Created from recycled materials, diverting tonnes of waste from landfills
- Interlocking pin system for alignment
- Porous construction and structural tile legs allow for unrestricted water drainage
- Highly durable
- Adheres to all Condo Board rules and bylaws
